

The **ACE**, Association of Conformity Experts was founded in the summer of 2020.

Our main purpose is to be able to **share up-to-date, accurate information** in the field of regulations and procedures related to legal conformity and safety of production equipment with professionals dealing with product conformity and safety.

We plan to **organize regularly professional trainings, events and conferences**, where we have the opportunity to share the information mentioned above. Of course, the participation in the events organized by ACE will be open not only to the members of the association, but also to all interested parties.

RESPONSE to the MARKING

Furthermore, we would like to **provide direct contacts between stakeholders and market surveillance authorities**, either within the framework of our events or in other ways.

We hope to be able to **strengthen the culture of compliance** of manufacturers and distributors, thereby promoting the conformity and safety of production equipment and products placed on the market!

We also pay attention for the **youth**, we spread the professional culture among **the students of the specialized field** within the cooperation of colleges and universities, we would like to arouse their interest in this field.

We are committed to introduce the requirements continuously and **the real, practical solutions** by organizing regular trainings.

We launched our **"Living with mind"** series of **free professional programmes** last November, which aims to explore a specific topic every two to three months. Those events have been held online so far.
